

Castagra is pleased to announce the winner of the 2022 Castagra Roofing Scholarship Program!

The Castagra Roofing Scholarship Program was designed to support individuals pursuing a career in roofing (or a similar field), who are passionate about innovation and/or sustainability. Our team was overwhelmed by the number of qualified applicants, and picking a winner was no easy task! Thank you to everyone who applied.

The winner of the 2022 Castagra Roofing Scholarship Program is Aren Mowreader, who is pursuing a degree in Construction Engineering and Management. Aren is incredibly passionate about the future of the construction industry. His goal is to study robotics as well as construction management, and use his education along with his working knowledge of the construction industry to help program and develop machines capable of performing menial tasks associated with large scale construction, in an effort to curb unnecessary waste and solve some of the industry's labor shortage issues.

Congratulations Aren!

"I believe automation is the future of the construction industry. As a tradesman, this is a hard truth to swallow, but I must adapt and face the writing on the wall. I envision a future where the trades are still relevant, but automation and programming are a large part of their toolbox. Much of my motivation is to create functional products that help those performing the work. This can only be done by someone with an intimate understanding of the work process needing to be done. I believe it is my responsibility as a construction professional to help my industry through this phase of growth."

Applications for the 2023 Castagra Roofing Scholarship Program are opening soon!
